SHADOWBOX CLARION

ShadowBox Clarion screens are constructed with a viewing surface that snaps onto the back side of a 1½″ extruded aluminum frame with a black powder coat finish. The assembled unit features a perfectly flat viewing surface with a clean, finished appearance.

OPTIONS

- **Viewing Surfaces—**M1300, M2500, HiDef Grey, AT1200 or AT Grey for front projection, or Cineflex rear projection vinyl.
- **Sizes and Formats—**Available in virtually any custom size up to 20′ x 20′. Overall size, including frame, equals image area plus 3″.
- **Frame Finishes—**Black aluminum is standard, and may be covered with velvety black Vel–Tex®, to eliminate reflections on the frame.

Full details available at: ***www.draperinc.com/go/Shadowbox.htm***

WRAPAROUND CLARION

With a WrapAround Clarion, the viewing surface wraps completely around the perimeter frame and attaches to the back side, so the screen is solid white—and perfectly flat—with no visible frame or border. Ideal for any application where the screen must be perfectly unobtrusive.

OPTIONS

- **Viewing Surfaces—**M1300, M2500 or HiDef Grey.
- **Sizes and Formats—**Available in virtually any custom size up to 20′ x 20′. Image area will match the overall size.
- **Frame and Borders—**No frame or borders are visible since the surface wraps completely around the frame.

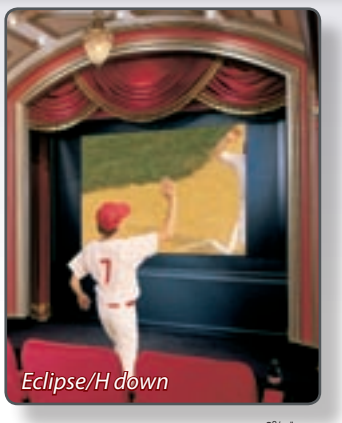
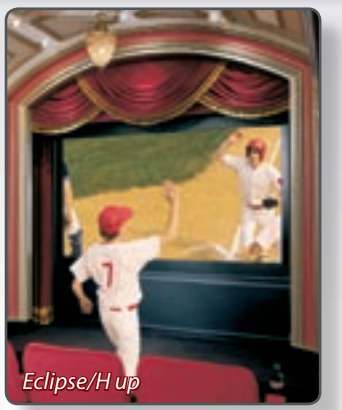
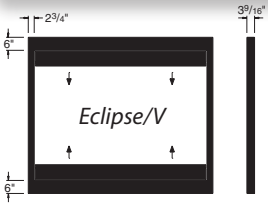
ECLIPSE

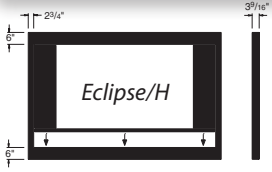


Eclipse/H down



Eclipse/H up





SWITCH INSTANTLY BETWEEN FORMATS

The Eclipse is a motorized masking system that mounts to the wall, framing a Draper Clarion or Cineperm. A special channel system keeps the screen as close as possible to the masking borders, giving it a seamless appearance. Images are fully bordered in flat black, so nothing interferes with your projected image—in any format. The Eclipse eliminates the need to buy two projection screens.

OPTIONS

- **Series V—**Image Area masked from top and bottom and the width remains constant. Standard format changes from 4:3 NTSC to 16:9 HDTV, or from 4:3 NTSC to 1.85:1 WideScreen.
- **Series H—**Image Area masked on the sides and the height remains constant. Standard format changes are from either 16:9 HDTV or 1.85:1 WideScreen to 4:3 NTSC.
- **Control Options—***Refer to page 6.*
